

# Introducing the NEW Bayley-4 COMING FALL 2019!

Scales of Infant and  
Toddler Development™  
Fourth Edition

## OVERVIEW:

**Age Range:**  
16 days to 42 months

**Qualification Level:** B

## 5 developmental domains:

### **Cognitive**

Visual preference, attention, memory, sensorimotor, exploration and manipulation, concept formation

### **Language**

Receptive and expressive language subtests

### **Motor**

Fine motor and gross motor subtests

### **Social-Emotional**

Communicating needs, self-regulation using emotional signals

### **Adaptive Behavior**

Listening and understanding, talking, caring for self, relating to others, and playing

### **Bayley Scales of Infant and Toddler Development™, Fourth Edition (Bayley™-4)**

assesses infant and toddler development across five scales: Cognitive, Language, Motor, Social-Emotional, and Adaptive Behavior.

Assessment of the Cognitive, Language, and Motor domains is accomplished by administering structured items to the child, and engaging the caregiver to support responses where appropriate.

The Social-Emotional and Adaptive Behavior scales are administered via caregiver questionnaire which allows them to share their own observations of the child's abilities.

## Top Reasons to Buy the New Bayley-4

### Caregiver Involvement

- Caregiver responses can be used to support the scoring of certain items

### Time Savings

- Reduced number of items and improved workflow provides time savings for the whole assessment
- The shortened adaptive behavior content from the Vineland™-3 saves the caregiver significant time

### New Content

- Content updates were made based on research and user feedback

### Improved Psychometric Properties

- Updated normative data and clinical studies

### **Bayley™-4 Screening Test Coming late 2019!**

Quickly determine if a child is on track developmentally or if more assessment is needed

### Digital delivery option

Bayley-4 will be available on Q-global® via a digital record form with integrated instructions and flexible administration to help navigate the assessment and improve the examiner workflow.

### **Key digital benefits include:**

#### Customization

- Adjusts the start point based on estimated due date if child was premature

#### Flexibility

- No need for a separate record form or administration manual
- Supports non-linear administration and administering related items

#### Ease of use

- Messaging included to guide establishing basal and meeting discontinue rules
- Contains pictorial representation of administration and examples for complex items
- All items in a series can be simultaneously scored based on a single response

#### Accuracy

- A review screen ensures all required data is captured prior to submitting the assessment
- Item score suggestions are provided based on when the timer is stopped or the number of correct responses to trials
